

## In the Spotlight

# COVID-19 VIRUS

## Facts

Symptoms include fever, cough, and shortness of breath.

The virus typically appears 2-14 days after exposure.

It spreads primarily from person to person via coughs, sneezes, and close contact.

## Avoid Getting Sick

Wash hands often with soap and water, especially after using the bathroom, before eating, and if hands are dirty. Use 60% alcohol-based hand sanitizer if you do not have access to soap and water.

Avoid touching your nose, mouth, and eyes.

Do not come in close contact with people who are sick or share their household items. Keep commonly touched items clean.

Avoid public places if there is an outbreak.

## If You Get Sick

Stay home except to get medical care, get plenty of rest, drink adequate fluids.

Separate yourself from people and animals. Cover coughs and sneezes, wash hands often, and do not share household items.

Call your doctor if you have been exposed to covid-19, if you have any difficulty breathing, or have any concerns.
